

## BEST BODY SHAPING DEVICE

Editor's note: The body shaping market encompasses a wide-range of technologies, therefore this award was segmented into two sub-categories.

### Best Non-Invasive Body Shaping Device

#### CoolSculpting by ZELTIQ Aesthetics

CoolSculpting® by ZELTIQ Aesthetics is the number one most requested, non-surgical body sculpting procedure. The groundbreaking CoolSculpting technology uses a patented cooling process to target and eliminate fat cells, without downtime, anesthesia, or pain medication during treatment. Millions of CoolSculpting treatments have been performed worldwide.

### Best Energy-Based Body Shaping Device

#### BTL Vanquish ME by BTL Industries

Further improving on its patented non-invasive Vanquish technology to reduce stubborn fat around the midsection, BTL Aesthetics introduces its newly engineered BTL Vanquish ME (Maximum Energy). This latest iteration takes body contouring to the next level with increased tuning performance, more concentrated thermal energy and less scatter to non-fatty tissue than previously possible. The result is a more homogeneous heating leading to higher overall temperature elevation. A large spot size is designed to treat the whole abdomen from flank to flank during one session.

## BEST FEMININE REJUVENATION DEVICE

#### ThermiVa by Thermi

ThermiVa treatments use radiofrequency energy to gently heat tissue so that women can reclaim, restore and revive feminine wellness without discomfort or downtime. The patent pending ThermiVa electrode is designed to treat the internal and external anatomical features of the vagina.
